Excellence.  
Every Day in Every Way.™

## Your physician has requested laboratory testing. *What now?*

Mercy Clinical Laboratory (MCL) has several locations for drawing blood or dropping off specimens for laboratory testing. You may choose the MCL Patient Service Center that is most convenient for you. No appointment is necessary for your specimen collection and most patients can expect only a 10 to 15 minute wait.

Your physician will give you an MCL test request form that indicates your lab orders. It is important for you to bring these orders with you to the MCL Patient Service Center. (Other options for orders are a prescription pad written and signed order, a customized order sheet or perhaps the order can be faxed to MCL.)

If your physician has given you special instructions for your testing, please inform MCL staff whether you followed these instructions. An example of this would be that you have been fasting (no food) for a certain number of hours.

Please be prepared to present your insurance cards to MCL staff when you first arrive. You will also be asked to verify your name, date of birth, address and social security number. Our staff will review this information with you each time you come to MCL for laboratory services. This provides MCL with the correct information for filing to your insurance company.

Quality laboratory results begin with a quality specimen. Our experienced phlebotomy staff and dedicated couriers will insure that your specimen is drawn correctly and delivered to Mercy Clinical Laboratory.

At MCL, we strive to make your experience as convenient and painless as possible.
