

Mercy Wireless Network: Requirements and Setup

Welcome Welcome to the Mercy wireless network!

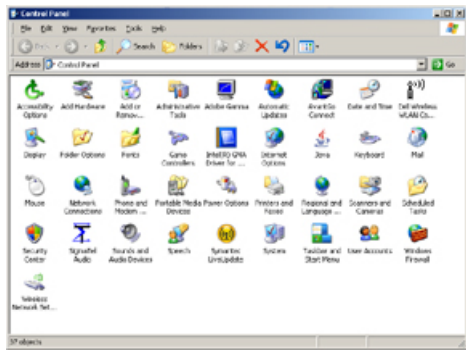

The Mercy Guest connection is a new, wireless access system where visitors, patients, and guests can use a mobile computer hand-held device to receive a wireless signal to access a high-speed Internet connection.

Requirements To access the Mercy Guest connection you will need:

- Wireless (i.e. wi-fi) card installed on your computer or hand-held device.
 - Appropriate wireless network adapter settings.
 - A location within range of a wireless access point.
-

Configure Wireless Adapter Is the wireless adapter on your device set up for use?

- If **YES**, read the document *Accessing the Wireless Network*.
- If **NO**, follow the steps below to configure the wireless adapter for your portable computer or other hand-held device:

Step	Action
1	☰ Start on the task bar.
2	Select Settings on the Start menu.
3	☰ Control Panel on the fly-out menu.
Result	<p>The Control Panel appears:</p>
