The 'total number' of hospitals in the table below is the total number of hospitals that had eligible admissions for this measure. See [Information for Professionals- Opens in a new window](#) for additional information about the data collection for the mortality measures.

Out of 4813 in the United States →	64 hospitals in the United States were Better than U.S. National Rate	4223 hospitals in the United States were No different than U.S. National Rate	163 hospitals in the United States were Worse than U.S. National Rate
	363 hospitals in the United States did not have enough cases to reliably tell how well they are performing		
Out of 116 in Iowa →	4 hospitals were Better than U.S. National Rate	109 hospitals were No different than U.S. National Rate	0 hospitals were Worse than U.S. National Rate
	3 hospitals in Iowa did not have enough cases to reliably tell how well they are performing		

Note: Medicare derived the 30-Day Risk-Adjusted Death (Mortality) measures from its own data about patients on Original Medicare and the hospitals that treat them. The information in this table reflects care given only to patients who are on Original Medicare. All data are [risk-adjusted- Opens in a new window](#).
